

## Milestone #4

Instructor: Ross Maciejewski

### 1 Milestone 4 Guidelines

The team should have created a final written document utilizing the IEEE TVCG style format (6-8 pages). Teams should also turn in source code and a video documenting the systems use.

For this milestone, the following need to be delivered:

- A 6-8 page document describing the work done throughout the semester. For this write up, students are expected to use the IEEE TVCG style format, details can be found at: <http://www.computer.org/portal/web/tvcg/author>
- A video (2-5 minutes in length) demonstrating your system.
- Source code and working executables for your project.
- Each group will turn in a single set of files. **DO NOT** have each team member submit the files.

### 2 Deadline

- **April 29<sup>th</sup> (5PM)** – Project design ideas. (30%)

### 3 Grading

The class project is worth 40% of the overall course grade. Milestone #4 will be 30% of the overall project grade.

- Late projects will not be accepted:
  - No assignments accepted after this point
  - The myASU timestamp will show when you uploaded your project.
